

Energy Trading

This organisation is a leader in the generation of electricity. These positions are a result of promotion and growth; they are both 12 month contracts with a possibility of permanency. Sydney based.

- **MARKET OPERATIONS MANAGER – ENERGY TRADING – Up to \$180,000 pkg.**

You will lead a team of Gas/Electricity Traders to deliver value to the business and assist in the establishment of Carbon Trading.

You are an experienced manager with a background in spot electricity markets and gas trading and an extensive knowledge in power station operations. Carbon trading would be an advantage as well as market analysis and regulatory exposure.

- **ELECTRICITY/GAS TRADER – Up to \$90,000 pkg.**

This position involves managing trading in gas markets and undertaking analysis of business performance in the NEM, gas, green and electricity hedging markets.

Trading in the NEM will be highly regarded as will your knowledge of gas market operations. You have tertiary qualifications in Engineering or Business.

If you would like to discuss these opportunities in Australia's fastest growing sector please call **Michael Green** or submit your resume to the email address below.
