

senior sustainability consultant

- **Global sustainability leader**
- **Supportive and innovative environment**
- **Growth opportunities**

A global leader in sustainable property development our client's vision is not simply to satisfy current environmental expectations but to go much further. Your task will be to work in partnership with project teams from the bid strategy planning and concept design onwards to drive world-leading sustainability solutions.

You will be responsible for the implementation of new business and product support services; the identification of sustainability solutions and opportunities for projects and clients and to design and to provide partnership and project roadmaps for environmental restoration and social programs.

You will have experience in sustainable property development. This is a challenging role in a supportive and innovative environment. You will be positioning yourself at an early stage in this career growth area. To discuss in confidentiality call **Simon Fjell** on **03 8319 4090**.

general manager solar

- **New Solar business with large European parent**
- **Residential and small commercial solar**
- **Great opportunity to continue your solar career**

Large well known European brand is establishing a renewables business in Australia with a Brisbane Head Office. Residential solar will be the initial offering. They have the capital to weather the stop/go nature of the Australian solar industry.

Reporting to an overseas based Director your role is to establish the company then grow the business. After solar our client is interested in establishing other renewable energy businesses. Our client has the financial capacity to, ultimately, invest in commercial scale renewable projects.

You have senior level business experience in the solar industry and would view this start up as an exciting challenge. This appointment is not dependent on the carbon tax being passed through Parliament.

It's an interesting role, if you would like to discuss it then call **Michael Green** or just submit your resume.

Bradman Recruitment – Level 6, 60 Carrington Street Sydney 2000.

mechanical building services - team leader

- **Design through commissioning**
- **International business leader**
- **Performance guarantee - ESD**

Our client is a fast growing, dynamic, international energy efficiency company with numerous high profile award winning projects. With a strong commitment to ESD they are emerging as an industry leader in managing the impact of their projects on the environment with numerous Greenstar projects completed. And also, with performance guarantee contracts, they go the extra mile to make sure it's possible.

Your experience in building services and ESD combined will target cost effective and high scoring Greenstar design by integrating the best outcomes to confidently meet pay back commitments of performance guarantees. You will manage the design through to commissioning of housing, retail, public buildings, warehousing, sports, leisure and commercial projects up to \$200 million.

As an experienced professional with a good knowledge of building services and of ESD you enjoy complex problem solving and are able to integrate the best efforts of project teams. You will be responsible for providing business development and project teams with assistance, and advice in relation to all building services and ESD considerations.

To discuss in confidentiality call **Simon Fjell** on **03 8319 4090** or directly submit your resume and cover letter.

asset manager renewable energy & gas utility scale power plants

- **Work for the clean energy market leaders!**
- **Use your expertise in energy to develop a great business**
- **Fantastic career opportunities will be offered**

Our client is an energy market leader dedicated to the deployment of large scale renewable energy utility scale plants in Australia. The role is to manage a portfolio of energy assets (cogeneration, renewable energy under 20MW, gas) and to ensure commercial outcomes are met in accordance with financial plans.

The position is key in balancing the multiple requirements of commercial, technical, HSE, regulatory and personnel imperatives to achieve strategic and operational outcomes. You will make strategic decisions in regards to asset management, HSE and contracting approach, resource level and operational decisions and long term capital expenditure.

You have a detailed knowledge of complete asset and all systems from fuel source to product delivery and metering (NEM, cogeneration); HSE management and other quality assurance processes; engineering project and contract management combined with commercial and financial skills, power station operations and maintenance experience (gas, steam turbines, cogeneration).

If you would like to discuss this exciting and career enhancing position, please call **Julien Lacave**.
