

# business manager

- **Commercial experience welcomed**
- **Address environmental and social issues**
- **Lead and build IT social enterprise**

WorkVentures is a catalyst for social change by undertaking initiatives that directly empower disadvantaged people to build positive futures.

It achieves this by providing tools to create new skills, access to technology, fulfilling traineeships and sustainable employment.

It establishes and builds effective partnerships with local residents, government, business and community partners.

Reporting to the CEO you will lead the *Connect IT* program which delivers affordable PCs to disadvantaged communities via companies and governments disposing of superseded IT equipment. You will be responsible for all aspects of the program, including sourcing PCs and achieving re-sale targets through marketing campaigns, distribution partnerships and the call centre.

You are entrepreneurial, and able to demonstrate your commercial acumen in relationship management, sales and product development, as well as your capacity to drive and execute strategy.

**If bridging the digital divide is of interest to you, please contact Shiree Thomas on 02 8243 0570 or email [cv@ngorecruitment.com](mailto:cv@ngorecruitment.com) quoting reference 30259.**
